

SATMONITOR

Satmonitor is a user-friendly Web Platform developed by Italspazio **that provides realtime VSAT Monitoring** that grants the enduser a comprehensive overview over connected assets.

The platform is optimized for cross-platform and can be accessed from tablet, smartphone and desktop. The scope of the platform is to provide live tracking solutions for either fixed or mobile stations.

The tracking is visually represented by color-coded markers displayed on geographical mapping software powered by Google.

Additionally, **the platform has also** been designed to **integrate** essential services such as **real-time remote sensing** (Weather reports) and **technical satellite data** (Coverage, Latency & IP Traffic data) for control and security purposes

VSAT & MARITIME SERVICES

Italspazio provides Satellite Internet Connectivity Services. Collaboration with different satellite operators (RSCC, Gazprom, etc.) and Teleport (Sielte, Milano, Teleport, Signal Horn, etc.), provides bundle VSAT services on different platform and on different satellite.

TYPE OF SATELLITE

AM44 (RSCC) @11°W for Ku Band services in Europe
Yamal 402 (Gazprom) @55°E for Ku Band services in Europe and Africa
Arabsat 5C (Arabsat) @20°E for C Band service in Africa
Hylas 2/4 (Avanti) @33°E for Ka Band services in Europa and Africa

The above satellites allow for a wide coverage and the ability to reach those countries whose infrastructures is underdeveloped.

Coverage is especially necessary in those rural areas with a high presence of solar parks as they require constant monitoring for security and maintenance aims.

TYPE OF SERVICE

Italspazio offers a wide range of maritime service. The coverage is obtained through a selected fleet of satellites that allow an extended coverage from Europe to the Caribbean. The maritime services are conducted from fixed satellite antennas used to track the relevant satellites through a dedicated bandwidth.

Italspazio offers high quality services and solutions at competitive prices. Some of many services include: Internet connectivity, VPN access, VoIPbased services and vessel tracking. Access to these services can be offered through either a shared or guaranteed bandwidth. Upon request, Italspazio may also seek to accommodate personalized requests from the customer if specific coverage, bandwidth or equipment is required.

SATMONITOR MAIN FEATURES

LIVE TRACKING

Accurate Live Tracking solutions for wither Mobile or Fixed stations

REMOTE SENSING

Real-Time display of global climatic conditions for both land and sea

SIMPLE SETUP

The Satmonitor Platform only requires a SNMP compatible device for a quick installation

CROSS-PLATFORM

Multi-Device platform access (Tablet/Smartphone/Desktop Support)

SUB-LICENSING

Upon request the Satmonitor platform may be bought in a package with sub-licensing

24/7 NOC SUPPORT

Optional 24/7 NOC Support for live tracking solutions
